

I want to make it known that I oppose the FBI's request for internet wiretapping. Innocent before proven guilty, regardless of having nothing to hide, and proper procedures are paramount. Law enforcement needs a good reason to gather personal, private data without consent before actually doing so. By allowing such widesweeping wiretap of the internet provides a huge potential for misuse, false positives, and an unknown amount of personal harm toward generally law abiding citizens.

Please do not support this request.
